CODE ZCYAZ

45A COMPLETE RADIOTELEPHONE - RADIOTELEGRAPH INSTALLATION

45A Radiotelephone - Radiotelegraph Transmitter, 40 watts
telephone, 125 watts telegraph, complete with:

Tuning units for one Amateur Band
"A" Cut crystal and holder for Amateur Band
CD-104 Diaphragm type crystal microphone
C23 Desk type Microphone stand
Shielded microphone plug
R-64 Telegraph key
One set of tested tubes

\$387.00

Tuning units with "A" cut crystal for one Amateur band are
supplied as standard equipment. For additional Tuning units
less crystal, to cover other amateur bands, including 10
meters add \$18.00 per band.

If 20 meter tuning units are supplied, additional cost for
10 meter operation is \$10.00

For operation on 80, 40, 20 and 10 meter bands, 80 meter
crystals are required. These crystals must be harmonically
related to the operating frequencies.

On the 160 meter band, a 160 meter crystal is required. This
same crystal can also be used on the 80 meter band provided it
is in proper harmonic relation.

160 meter crystals "A" cut type in CH holder	\$ 11.25
80 meter crystals "A" cut type in CH holder	11.25

Quotations for Commercial Frequencies supplied on request
