30W TRANSMITTER ASSEMBLY

The combination of the 10A Crystal Control Unit and the 500AX Power Supply provides a low priced, highly efficient crystal controlled transmitter which is the ideal arrangement for the amateur who wishes to start out with a high grade transmitter. Both units can be later used in a high powered transmitter.

Assembly 30W consists of these two units mounted on a neat cadmium plated steel frame which provides a mounting panel for the meters and other accessories. The entire assembly measures 19"x10"x16" high, and forms a completely self-contained C.W. transmitter with a carrier power of 30 watts.

Price — Assembly 30W complete with cadmium plated frame, inter-unit cable, power cable, line switch and pilot indicator, less tubes and meters-----\$73.64
Same as above but equipped with two Weston surface mounting meters-----\$84.64
Same as above but equipped with four Weston surface mounting meters---\$95.64
