

Dear Folks,

Lay + I were happy to receive your invitation to visit with you over the week-end and we are very sorry that we can not accept, due to a more previous engagement.

I have been very busy recently. Hewitt - designing a new "ham" transmitter. It will come out in a QST ad next issue. I will give you a little advance scope on it and you can let me know what you think of it. I am enclosing a picture + if I can find a print of the simplified schematic I'll send one along.

It will use our C100D negative resistance oscillator with three stages of 807 buffer-doublers feeding a
