

pair of C101's in push pull (HF100) in the final amplifier. Power output rating is 250 watts modulated class B by a pair of C120. Fixed bias in combination with resistor bias on all stages. Doesn't it sound like some transmitter? I would appreciate your comments on the rig. Also do you like the new styling?

Let me know how long you will be in Newton Haven.

So sorry we can't come this week-end!

Sincerely,

Merrill & Jay.

P.S. I'm going home now - hence the speedy note.
